Launch Control XL 3 — Bass Synths Comparison

Same custom mode as the drum machines comparison (MIDI channel 16, memory slot 15). Each column is one bass sound; all play the same bassline at the same time, at 118 BPM. Use the faders to choose or layer them. Everything starts silent (faders at 0). On load, the code sets the knobs to a short, round starting sound: note length 0.25 s, lowpass 250 Hz, a little reverb. Reload the page if the drum machines comparison was running before.

	1 · Sine	2 · Triangle	3 · Saw warm	4 · Square	5 · Supersaw	6 · FM	7 · Sub + Oct.	8 · Pluck
Row 1 Length	CC 13 **Length** 50 ms … 1 s. Left = short and tight, right = long and flowing.	CC 14 **Length** 50 ms … 1 s. Left = short and tight, right = long and flowing.	CC 15 **Length** 50 ms … 1 s. Left = short and tight, right = long and flowing.	CC 16 **Length** 50 ms … 1 s. Left = short and tight, right = long and flowing.	CC 17 **Length** 50 ms … 1 s. Left = short and tight, right = long and flowing.	CC 18 **Length** 50 ms … 1 s. Left = short and tight, right = long and flowing.	CC 19 **Length** 50 ms … 1 s. Left = short and tight, right = long and flowing.	CC 20 **Length** 50 ms … 1 s. Left = short and tight, right = long and flowing.
Row 2 Lowpass	CC 21 **Lowpass** 80 Hz … 4 kHz. Left = dark, right = bright. No effect on the sine.	CC 22 **Lowpass** 80 Hz … 4 kHz. Left = dark, right = bright. No effect on the sine.	CC 23 **Lowpass** 80 Hz … 4 kHz. Left = dark, right = bright. No effect on the sine.	CC 24 **Lowpass** 80 Hz … 4 kHz. Left = dark, right = bright. No effect on the sine.	CC 25 **Lowpass** 80 Hz … 4 kHz. Left = dark, right = bright. No effect on the sine.	CC 26 **Lowpass** 80 Hz … 4 kHz. Left = dark, right = bright. No effect on the sine.	CC 27 **Lowpass** 80 Hz … 4 kHz. Left = dark, right = bright. No effect on the sine.	CC 28 **Lowpass** 80 Hz … 4 kHz. Left = dark, right = bright. No effect on the sine.
Row 3 Reverb	CC 29 **Reverb** Left = dry, right = medium reverb.	CC 30 **Reverb** Left = dry, right = medium reverb.	CC 31 **Reverb** Left = dry, right = medium reverb.	CC 32 **Reverb** Left = dry, right = medium reverb.	CC 33 **Reverb** Left = dry, right = medium reverb.	CC 34 **Reverb** Left = dry, right = medium reverb.	CC 35 **Reverb** Left = dry, right = medium reverb.	CC 36 **Reverb** Left = dry, right = medium reverb.
Fader Level	CC 5 **Level** 0–1, sounds roughly matched	CC 6 **Level** 0–1, sounds roughly matched	CC 7 **Level** 0–1, sounds roughly matched	CC 8 **Level** 0–1, sounds roughly matched	CC 9 **Level** 0–1, sounds roughly matched	CC 10 **Level** 0–1, sounds roughly matched	CC 11 **Level** 0–1, sounds roughly matched	CC 12 **Level** 0–1, sounds roughly matched
Buttons 1 Bassline	CC 37 **Bassline** 1 → 2 → 3 → 4	CC 38 **Bassline** 1 → 2 → 3 → 4	CC 39 **Bassline** 1 → 2 → 3 → 4	CC 40 **Bassline** 1 → 2 → 3 → 4	CC 41 **Bassline** 1 → 2 → 3 → 4	CC 42 **Bassline** 1 → 2 → 3 → 4	CC 43 **Bassline** 1 → 2 → 3 → 4	CC 44 **Bassline** 1 → 2 → 3 → 4
Buttons 2 Octave	CC 45 **Octave** normal ↔ one octave up	CC 46 **Octave** normal ↔ one octave up	CC 47 **Octave** normal ↔ one octave up	CC 48 **Octave** normal ↔ one octave up	CC 49 **Octave** normal ↔ one octave up	CC 50 **Octave** normal ↔ one octave up	CC 51 **Octave** normal ↔ one octave up	CC 52 **Octave** normal ↔ one octave up

Buttons on **Momentary**. The box at the bottom right of the Strudel page shows the bassline and octave of each column. After re-evaluating, everything starts at bassline 1, normal octave. To layer, keep all columns on the same bassline; different basslines at the same time clash.

The sounds

1 · Sine softest · pure
Only the fundamental, no overtones. Felt more than heard; almost inaudible on small speakers.

2 · Triangle soft · warm
Sine plus a few quiet overtones, so it stays audible on small speakers. This is example B.

3 · Saw warm analog · full
Sawtooth, very rich in overtones. With the lowpass nearly closed it is a warm analog bass; opening it makes it bright.

4 · Square hollow · woody
Square wave, hollow sound; with the lowpass open, a bit like a clarinet.

5 · Supersaw wide · shimmering
Several slightly detuned sawtooths: a wide pad bass.

6 · FM glassy · slight growl
A sine modulated by a second sine.

7 · Sub + Oct. deep · audible everywhere
Sine for the depth plus a quiet triangle one octave higher.

8 · Pluck squelchy · acid
Sawtooth whose filter snaps open on each note and closes again.

Basslines (button row 1), all in A minor

1	Offbeat	One note on every “and” between the kicks, the classic house/techno bass. A, A, F, G, one bar each.
2	Rolling	Three sixteenths after each kick, drives forward.
3	Octave eighths	Root and octave alternating.
4	Syncopated	Groove with notes off the beat, two bars.
