Launch Control XL 3 — Track 008 — groove techno

Groove techno on F minor, 140 BPM. Jojo plays the foundation (kick, bass, drums), Jonas the colour (pads, stab, percussion) and the global column 8.

Every row means the same everywhere: row 1 = brightness, row 2 = space, row 3 = character, fader = level, button 1 = next pattern (at the next bar), button 2 = a moment while held.

Start with all faders down. Nothing sounds until Jonas' master fader (column 8) is up. Jonas' pad button 1 changes the chords, and Jojo's sub and bassline follow.

Every Launch Control XL 3 gets this full layout: Mode 1 = Jojo (foundation, columns 1–7; Jojo's column 8 (Ride) stays off; Mode 1 sends the same CCs as Mode 16), Mode 2 = Jonas (colour). Column 8 is global on both pages. Two controllers: the control moved last wins.

Guide

Playing together

Jojo builds the floor: kick first, rumble right next to it, then sub and hats, then clap, bassline and the groove (percussion, ride).

Jonas colours it: pad first, then the techno pad under it (all knobs at 0 is a good start), then dark percussion and the sequence. Stab and answer are for the peaks, the breathing FX for long transitions.

The pad's button 1 changes the chords for both players: Jojo's sub and bassline move with it. Pad button 2 (freeze) holds the chord for everybody.

Break: one press takes out kick, rumble, sub, bassline and clap at the next bar; hats, percussion, ride and all of Jonas' sounds keep going. Turn Tension up during the break (its snare roll keeps playing), press again: everything is back on the one. Then let Tension go.

Both Launch Controls have the full layout and steer the same sounds: whoever moves a control last sets its value, a button press counts from either. Agree who plays which page.

Every position sounds good

No filter closes completely. Sequence, answer and FX keep a little room even at space 0.

Status box

The status box at the bottom right of the Strudel page shows chapter, break and each stem's pattern. Its button “als Fenster” opens it as a small window that stays on top (Chrome/Edge).

Playing alone

A run is: build the beat in Mode 1, switch to Mode 2, add colour, use column 8 (chapter, break, tension) for the drop. Mode 1 is set up in Components with the same CCs as Mode 16.

Faders are shared hardware: after a mode switch each sound keeps its value until you touch its fader, then it jumps to where the fader physically is. Move faders gently after switching.
