Launch Control XL 3 — Track 009 — house (two controllers)

Happy, jazzy, dry house in A minor, 124 BPM. Jojo plays the rhythm (kick, bass, drums, percussion), Jonas the harmony with the chord progressions (column 1), the keys (column 2), the vibraphone (column 3), the flute (column 4; 5-7 empty for now) and the global column 8.

Every row means the same everywhere: row 1 = brightness, row 2 = space, row 3 = character, fader = level, button 1 = next pattern (at the next bar), button 2 = a moment while held.

Start with all faders down. Nothing sounds until Jonas' master fader (column 8) is up. Chapter (Jonas, column 8) switches between one chord (Vamp) and the progression chosen on Jonas 1 (Wechsel) at the next 4-bar phrase.

The status box at the bottom right of the Strudel page shows chapter, break and each stem's pattern. Its button “als Fenster” opens it as a small window that stays on top (Chrome/Edge).

Guide

Building it up

One layer after the other, not all at once: drums (kick, hats, clap), then bass and sub, then the keys, then percussion (congas, tambourine). Start in Vamp.

Harmony

Button 1 of column 1 picks the progression (at the next 8-bar phrase); it plays when Chapter is Wechsel. Row 3 fades strings → strings + B3 → B3.

Keys

1:1 from the keys lab (round 19, column 2): brightness, space, length; button 1 = stab rhythm (8); button 2 = sound: the knobs mix the sound (piano → Rhodes, organ B3 → M1, vibraphone → marimba), the fader sets how strongly the overtones follow the accent.

Break and drop

Jonas presses Break: the whole rhythm goes out at the next bar, only the keys keep playing. Jojo holds the riser (noise pump, button 2). Jonas switches Chapter to Wechsel and presses Break again: everything is back on the one, now with the progression.

Every position sounds good

All knobs at 0 is dry, close and clear, as the track is meant to be. Space adds room, it does not repair. Every column has its own fader: each layer can be muted on its own.
