Launch Control XL 3 — Track 009 — dry house (one controller)

Dry, happy oldschool house in A minor, 124 BPM: short sounds, one piano hook on the off-beats. Jojo plays the rhythm (kick, bass, drums, percussion), Jonas the melody (pad, piano, riff, organ, vocal chops, orchestra hit, Rhodes) and the global column 8.

Every row means the same everywhere: row 1 = brightness, row 2 = space, row 3 = character, fader = level, button 1 = next pattern (at the next bar), button 2 = a moment while held.

Start with all faders down. Nothing sounds until Jonas' master fader (column 8) is up. Chapter (Jonas, column 8) switches between one chord (Vamp) and two chords (Wechsel) at the next 4-bar phrase.

One controller: Mode 1 = Jojo (foundation, columns 1–7; Jojo's column 8 (Tamb / Ride) stays off; Mode 1 sends the same CCs as Mode 16), Mode 2 = Jonas (colour). Column 8 is global on both pages.

Guide

Building it up

One layer after the other, not all at once: drums (kick, hats, clap), then bass and sub, then the piano hook, then percussion (congas, tambourine). Start in Vamp.

The hook

The piano is the one melody. Let it run, change it only a little: button 1 (stab → push → ghosts → answer), row 3 (bigger voicing). Riff, organ and Rhodes are alternatives for other sections, not a second layer on top.

Break and drop

Jonas presses Break: the whole rhythm goes out at the next bar, only piano or pad keep playing (pull the rest down). Jojo holds the riser (noise pump, button 2). Jonas switches Chapter to Wechsel and presses Break again: everything is back on the one, now with two chords.

Every position sounds good

All knobs at 0 is dry, close and clear, as the track is meant to be. Space adds room, it does not repair. Every column has its own fader: each layer can be muted on its own.

Status box

The status box at the bottom right of the Strudel page shows chapter, break and each stem's pattern. Its button “als Fenster” opens it as a small window that stays on top (Chrome/Edge).

Playing alone

A run is: build the beat in Mode 1, switch to Mode 2, add colour, use column 8 for the drop. Mode 1 is set up in Components with the same CCs as Mode 16.

Faders are shared hardware: after a mode switch each sound keeps its value until you touch its fader, then it jumps to where the fader physically is. Move faders gently after switching.
