Launch Control XL 3 — Track 010 — ambient house (one controller)

Ambient house in D minor, 120 BPM, a sunrise mood. Jojo plays the foundation (kick, bass, drums, congas), Jonas the colour (pad, chords, melodies, birds) and the global column 8.

Every row means the same everywhere: row 1 = brightness, row 2 = space, row 3 = character, fader = level, button 1 = next pattern (at the next bar), button 2 = a moment while held.

Start with all faders down. Nothing sounds until Jonas' master fader (column 8) is up. Chapter (Jonas, column 8) changes the chords for everybody at the next 4-bar phrase.

One controller: Mode 1 = Jojo (foundation, columns 1–7; Jojo's column 8 (Shaker / Ride) stays off; Mode 1 sends the same CCs as Mode 16), Mode 2 = Jonas (colour). Column 8 is global on both pages.

Guide

Sunrise

Start like the sky before dawn: Jonas brings pad and birds, Jojo the atmo pump and the sub. The kick comes only when both are ready.

Playing together

Jojo builds the floor: kick, sub, off-beat hats, then the rolling bass and the groove (congas, shaker). Keep it dry; the room belongs to Jonas.

Jonas colours it: pad and deep chords first (all knobs at 0 is a good start), then arp and marimba. The lead is for the long, slow moments.

Chapter changes the chords for both players at the next 4-bar phrase: sub, bass and every melody follow. Pad button 2 (freeze) holds the chord for everybody.

Build-up and drop

Jonas turns Tension up (echo, open filters, snare roll), presses Break at the top: the beat goes out, pad and birds float. Jojo holds the atmo riser, Jonas presses Break again: back on the one. Then let Tension go.

Every position sounds good

No filter closes completely. Arp, lead and marimba keep a little room even at space 0.

Status box

The status box at the bottom right of the Strudel page shows chapter, break and each stem's pattern. Its button “als Fenster” opens it as a small window that stays on top (Chrome/Edge).

Playing alone

A run is: build the beat in Mode 1, switch to Mode 2, add colour, use column 8 for the drop. Mode 1 is set up in Components with the same CCs as Mode 16.

Faders are shared hardware: after a mode switch each sound keeps its value until you touch its fader, then it jumps to where the fader physically is. Move faders gently after switching.
