Launch Control XL 3 — House Keys Lab 11 (lab/keys, round 11 for 009: touch strength)

Shift + the column's fader = strength: 0 = every hit equally loud (the comparison), full = about 6 dB between the hardest and the softest hit (2nd soft: the second rhythm silent). Move it while listening, with the drums on.

Column 1 = accent before gaps (all patterns). Column 2 = the same, accents also brighter. Column 3 = 2nd rhythm soft: only in the two overlays (chain + shifted chain, chain + pairs); starts on chain + pairs. Column 4 = both together. All columns equally loud at every strength.

Sound: hold any column's button 2 and turn its knobs: 1 = piano → Rhodes, 2 = B3 → M1, 3 = vibraphone → marimba. In Mode 2: faders 1-4 = grand, Rhodes, organ, vibraphone layers; knob 3 above each changes its character; faders 6 and 7 = drums and bass.

Mode 16 — Rhythms

	1 Accent before gaps	2 Accent, brighter	3 2nd soft (overlays)	4 Accent + 2nd soft	5	6	7	8
Row 1 Brightness	CC 13 **Brightness** dull ↔ bright (lpf 250 Hz – 12 kHz, a little resonance): the filter sweep; brighter also plays a little harder (±2 dB, a softer attack at the dark end).	CC 14 **Brightness** as 1 Accent before gaps	CC 15 **Brightness** as 1 Accent before gaps	CC 16 **Brightness** as 1 Accent before gaps	CC 17 —	CC 18 —	CC 19 —	CC 20 —
Row 2 Space	CC 21 **Space** 0 = dry; a 1/8 echo is there from the first turn (full at half), from about a third on the room joins (full at the top).	CC 22 **Space** as 1 Accent before gaps	CC 23 **Space** as 1 Accent before gaps	CC 24 **Space** as 1 Accent before gaps	CC 25 —	CC 26 —	CC 27 —	CC 28 —
Row 3 Length	CC 29 **Length** 0 = short stab ↔ hits ring four times longer.	CC 30 **Length** as 1 Accent before gaps	CC 31 **Length** as 1 Accent before gaps	CC 32 **Length** as 1 Accent before gaps	CC 33 —	CC 34 —	CC 35 —	CC 36 —
Fader Level	CC 5 **Level** accent before gaps: the longer the rest after a hit, the harder it is played.	CC 6 **Level** accent before gaps, the accents also clearly brighter.	CC 7 **Level** 2nd rhythm soft: only in the overlays the second rhythm softer and darker; other patterns: all hits equal.	CC 8 **Level** accent before gaps + 2nd rhythm soft, one slider for both.	CC 9 —	CC 10 —	CC 11 —	CC 12 —
Button 1 Change	CC 37 **Change** 8 patterns: chain → shifted chain → pairs → 3-3-2 → Kerri syncope → Kerri riff → chain + shifted chain → chain + pairs. Button 2 Shift	CC 45 **Shift** press = on / off: the 3 knobs mix the sound (piano → Rhodes, B3 → M1, vibraphone → marimba); the fader = strength (0 = all hits equal, full = about 6 dB difference; 2nd soft: second rhythm silent). Guide

What to listen for

Accent: does the hit before a rest land, so the loop breathes? Do the soft hits get lost under hats and clap, does a loud hit poke out over the kick? 2nd soft (overlays only): does the second rhythm sit behind as an accompaniment, or vanish? Brighter accent (column 2): does it sound like a harder key rather than a louder fader? Note the slider position you like per column.

Why off the kick

Stab rhythms that avoid the kick and sit on the off-16ths pull against the beat; hits on the kick double it and sound like a band. Two hits and 3-3-2 do start on the one: that is their weight.

Harmony

One chord only: Am9 in Kerri Chandler's shape (the 7th at the bottom, the 9 instead of the root). Chord changes have their own board: house-harmony-lab.
