Launch Control XL 3 — House Keys Lab 17 (lab/keys, round 17 for 009: hardness and touch from real recordings)

Each source plays real recordings from a soft to a hard strike: 1 Salamander grand (16), 2 Steinway (3), 3 Kawai (3), 4 Rhodes (5), 5 Yamaha upright (3), 6 vibraphone (4: soft and hard mallets), 7 organ (3 GM organs, no touch), 8 GM Rhodes (reference). All recordings levelled: hardness = timbre only.

Knob row 1 = hardness: which recording a normal hit plays. Shift + fader = touch: how far accents go harder and soft hits softer (0 = all the same recording). No brightness filter any more.

The samples load the first time they play: give it a few seconds. In Mode 2: fader 6 = drums (knob 1 = swing, button 2 = drums out), fader 7 = bass.

Guide

What to listen for

Hardness per column: where does each source sound best? Touch at 0, half and full: do the hits sound played, not like copies, without single hits standing out? Note per column: keep / drop, hardness and touch position.

Why off the kick

Stab rhythms that avoid the kick and sit on the off-16ths pull against the beat; hits on the kick double it and sound like a band. Two hits and 3-3-2 do start on the one: that is their weight.

Harmony

One chord only: Am9 in Kerri Chandler's shape (the 7th at the bottom, the 9 instead of the root). Chord changes have their own board: house-harmony-lab.
