Launch Control XL 3 — House Keys Lab 13 (lab/keys, round 13 for 009: played feel, warmth, character)

Touch as decided (brighter accent before gaps, 2nd rhythm soft) on every column. Each column adds one idea; shift + the column's fader = how much (0 = none: all columns alike, the comparison). Start: half. All columns equally loud at half.

1 top note louder. 2 harder hits bite and open up instead of only getting louder. 3 keys a little behind the drums. 4 keys swing more than the hats. 5 keys duck on the kick. 6 tape: slight wow, saturation, soft top. 7 sampler grit: fewer bits, lower sample rate. 8 chorus: two detuned copies left and right.

Sound: hold any column's button 2 and turn its knobs: 1 = piano → Rhodes, 2 = B3 → M1, 3 = vibraphone → marimba. In Mode 2: faders 1-4 = grand, Rhodes, organ, vibraphone layers; knob 3 above each changes its character; faders 6 and 7 = drums and bass.

Guide

What to listen for

Against column 0-fader (all alike): does it sound more like a player, or warmer, without losing the groove? Columns 1-2 = how a hit sounds, 3-5 = how the keys sit against the drums, 6-8 = warmth and character. Note per column: keep / drop and the fader position you like.

Why off the kick

Stab rhythms that avoid the kick and sit on the off-16ths pull against the beat; hits on the kick double it and sound like a band. Two hits and 3-3-2 do start on the one: that is their weight.

Harmony

One chord only: Am9 in Kerri Chandler's shape (the 7th at the bottom, the 9 instead of the root). Chord changes have their own board: house-harmony-lab.
