Launch Control XL 3 — Track 007 (ambient)

Dreamy ambient in D lydian (the raised fourth G♯ gives the floating, “staring at the sky” colour). About 70 BPM, no drums: the rhythm comes from breathing swells, drops and calls.

Every column works the same way: HPF, LPF, character, level, and button row 1 = next random variation (8 per stem, cycling). The global button re-rolls all stems at once.

LPF knobs at 0 are almost closed: open row 2 first. The global knobs at 0 are neutral (dry, clear, no wobble).

The status box at the bottom right of the Strudel page shows which variation (1–8) each stem plays, and the drone chord.
