Launch Control XL 3 — Track 009 — cool house (two controllers)

Cool, minimal classic house in A minor, 122 BPM: few parts, straight grid, one iconic stab. Jojo plays the foundation (kick, bass, drums, ride), Jonas the colour (pad, stab, riff, acid, Rhodes, voice, dub chord) and the global column 8.

Every row means the same everywhere: row 1 = brightness, row 2 = space, row 3 = character, fader = level, button 1 = next pattern (at the next bar), button 2 = a moment while held.

Start with all faders down. Nothing sounds until Jonas' master fader (column 8) is up. Chapter (Jonas, column 8) changes the chords for everybody at the next 4-bar phrase.

The status box at the bottom right of the Strudel page shows chapter, break and each stem's pattern. Its button “als Fenster” opens it as a small window that stays on top (Chrome/Edge).

Guide

Playing together

Less is the point: Jojo builds kick, hats, sub and clap and then mostly leaves the patterns alone. Atmo, rim and shaker / ride come and go with the faders.

Jonas: the stab is the hook. Bring it in alone, let it run for 16 bars, work only its brightness. The riff or the acid line is the second voice, rarely all three at once. Pad, Rhodes, voice and dub chord are for the quiet parts.

Chapter changes the chords for both players at the next 4-bar phrase. Chapters 1-4 are voice-led progressions, 5-8 the parallel minor-9 chord memory. Sub, bass and the chords follow; riff, acid and voice keep their melody and only bend a note where it would clash. Pad button 2 (freeze) holds the chord for everybody.

Build-up and drop: Jonas turns Tension up (echo, open filters, snare roll), presses Break at the top: the beat goes out, pad and stab float. Jojo holds the riser (atmo, button 2), Jonas presses Break again: everything is back on the one. Then let Tension go.

Every position sounds good

Space 0 is dry and close, as the track is meant to be; room is a colour you add. No filter closes completely.
